## Horizontal Single Axis 2XN Independent Tracking System With Bifacial PERC Modules

- Simple parts
- Highly pre-assembled
- No welding
- Man-hours saving

- Single-row structure
- No push rod
- Efficient construction
- Cost savings

- Terrain adaptability
- Strong wind protection
- Rain cleaning mode
- Automatic snow removal

## Solution of Bifacial PERC Modules + Horizontal single Axis 2XN Independent Tracking System

The perfect match between horizontal single-axis 2XN portrait independent tracking system and bifacial PERC modules greatly improves PV efficiency and increases the PV electricity yield of **10%~26%**. We become the leader of a new generation of high-return PV power station system.

- Bifacial PERC portrait+ Horizontal single-axis 2XN portrait independent tracking system means up to **20%** increase in electricity yield.

- Common monocrystalline + intelligent tracking products means up to **24%** increase in electricity yield.
